

Non-Profit Organizations

Workshops for Non-Profit Organizations Working with Families

Early Learning Works hosts workshops for organizations with teams who work with families and caregivers of children from birth through age 8.

These workshops equip non-profit organizations that work with families and caregivers with practical skills to enhance their children's development and foster healthy family dynamics. Each workshop covers evidence-based strategies that professionals can use to guide parents in supporting their child's growth, behavior, and well-being during these critical early years.

Our workshops are offered during the workday, evening, or as Lunch & Learns over the lunch hour. Early Learning Works can customize these workshops to fit the needs of various organizations. Below are examples of just some of our workshops. Contact us and we can discuss the best options for your group: (918) 779-6005 or earlylearningworks@tulsaeducare.org.

Tired of Saying 'No' All the Time? Explore How to Encourage Cooperation

Overview: Saying "no" repeatedly can be draining and ineffective. This workshop provides strategies to encourage cooperation in young children.

Topics Covered:

- Creating age-appropriate spaces
- Setting clear, consistent limits
- Redirecting behaviors and focusing on the positive
- Offering children choices to foster independence and cooperation

School Readiness... Beyond the ABCs

Overview: School readiness is more than knowing the alphabet. This session explores essential skills that support children's success in school and beyond.

Topics Covered:

- Understanding executive function skills
- The link between executive function and school readiness
- How parents and caregivers can build these skills through everyday activities

The Importance of Play

Overview: Play is not just fun, it's essential for brain development. Learn how to maximize the developmental benefits of play with your child.

Topics Covered:

- Why play is vital for young children's brain development
- Key developmental skills learned through play
- Practical tips for engaging with your child during play to enhance learning

Why Early Language Development Matters

Overview: Language development is critical in the first three years. This workshop provides insights into fostering language growth in young children.

Topics Covered:

- The significance of early language development
- Key language milestones from birth to age three
- How parents and caregivers can support language development through interaction and activities

Brain Development and Building Executive Function Skills

Overview: Parents are a child's first and most important teachers. This session highlights brain development and how parents can nurture executive function skills.

Topics Covered:

- Key stages of brain development in early childhood
- The role of parents in supporting executive function skills
- Simple activities to promote self-regulation, attention, and problem-solving

Why Limiting Screen Time is Important

Overview: Managing screen time is essential for healthy development. Learn about the impacts of excessive screen time and how to set reasonable limits.

Topics Covered:

- The negative effects of too much screen time on children
- Recommendations for healthy screen time limits
- Strategies for creating a balanced daily routine that includes screen time boundaries
