

Support for Child Care Providers

Learning Getaways Series:

Offered to child care providers, this series includes professional development and coaching activities during a session. Topics include business and pedagogical best practices.

Coaching & Consultation:

We engage in intensive coaching and professional development with child care providers, identifying strategies and solutions, providing individualized hands-on support and modeling, deliver staff training, and offer free resources and materials.

Playground Supervision Program:

This program supports child care homes by providing assessments of their backyard to ensure safety & compliance with state regulations. We conduct a walk through the yard or playground space, assess the area and provide feedback to discuss possible improvements. We offer a stipend toward the purchase of items to enhance the quality of their playground space.

Other Projects:

ELW joins with other community organizations to offer innovative and educational programming to child care providers. One of those collaborations was with Art4orms, a non-profit that trains providers in high-quality art programming.
